Data Mapping Project

- **Aims**

- To identify and map the range of data sources on ageing at the European and national levels
- To identify gaps and challenges in the current data infrastructure
- To inform the development of the JPI's Strategic Research Agenda, and any calls or research proposals that will follow from it

Data Mapping Project

- **Result**

- Identification and evaluation of 437 data sources for the study of ageing
 - » Considers the needs of different user profiles: scholars, policy makers, analysts
 - » Key is to avoid repetition of work by individual projects and to ensure that research proposals are well informed about existing data sources
- Identification of the potential and needs of the current data infrastructure
 - » Data availability
 - » Research lines
 - » Funding possibilities
 - » Current and future activities
