Smart integrated multitrophic city food production systems – a water and energy saving approach for global urbanisation
CITYFOOD

Project pitch London 2018

Urban concepts

WP 1
Knowledge base and assessments

WP 2
Urban planning and FWE Nexus

WP 3
Modelling and optimization

WP 4
Living labs and evaluation

WP 5
Dissemination and exploitation

WP 6
Project coordination and management

- **Food**
  - fish & plants, protein shift

- **Water**
  - reuse, waste reduction

- **Energy**
  - saving, urban resources
