

Partner Search Form

Sustainable Urbanisation Global Initiative (SUGI)/Food-Water-Energy Nexus

Applicants looking for project partners can generate a “Partner Search Form” describing the profile of the organization they want to collaborate with. Applicants looking for project partners can also publish their ideas in the [LinkedIn group](#). The completed partner search form can be sent to the Call Secretariat who will publish it on the JPI Urban Europe website and on the LinkedIn Group as well.

Send the filled in form to: magnus.brink@iqs.se

Date: 8.1.2017

Section 1 – I am looking for:

A partner for my project

A project to join

Section 2 - Call Information: which topic(s) do you address?

Topic 1. Robust Knowledge, Indicators and Assessments

Topic 2. Multi-level Governance and Management of the Food-Water-Energy Nexus

Topic 3. Managing Potential Strategies and Solutions to address emerging Risk and Tradeoffs at the intersection of Sustainable Urbanisation and the Food-Water-Energy Nexus

Section 3 - Your Organisation

Organisation name and location: NHTV Breda, The Netherlands

Contact person: Jorn Fricke

E-mail: Fricke.j@nhtv.nl

Website: www.nhtv.nl

Description of the organisation (max. 100 words):

NHTV Breda is a multidisciplinary institution with a wide range of research experience, including hospitality, leisure, serious gaming and urban logistics. Currently, we are lead partner in the JPI ENSCC Urban Europe funded project SCITHOS (Smart City Hospitality – www.scithos.eu) and have experience with funding of research work. We are seeking cooperation with interested academic and non-academic organizations from the public and private field in order to develop strategies that will help stakeholders in urban areas worldwide to improve benefits of urban development in the food-water-energy nexus.

Section 4 - Free Keywords:

Hospitality, sustainability, resilience, collaborative economy, place making

Section 5 - Project Description

In times of rapid urbanization in combination with various other sustainability challenges that we, as society, face, the collaborative economy can have the potential to provide solutions that enable a wider range of stakeholders to become actively and meaningfully involved in shaping a sustainable society and their own communities while making more efficient use of available resources, such as food, water and energy.

At the same time the mainstream examples of the collaborative economy are often criticized for the ambiguous impact on urban businesses and society. Identifying the role that various stakeholders play in this field, pinpointing the positive and negative experiences and the underlying reasons for success or failure will help policy and decision makers in urban areas to make use of the collaborative economy as a catalyst for sustainable development also with the aim of enhancing government practices and improving resilience in urban areas worldwide.

With our expertise in place making and shaping destinations, with special emphasis on city hospitality concepts as crucial building blocks for resilient communities, we aim to use this project to identify the ways in which the collaborative economy can be used as a catalyst for enhancing the resilience of the urban food-water-energy nexus and its governance.

Section 6 - Partner Profile Sought

Type of organisation: Academic and non-academic institutions in the EU with experience in EU funded projects

Required Skills and Expertise (if applicable):
