Building capacity for integrated governance at the Food-Water-Energy-nexus in cities on the water

## Aims/objectives

- Capacity building for the urban food-water-energy (FWE) nexus, creation of science-citizen-policy interfaces.
- Fostering knowledge exchange and cooperation among local stakeholders on the FWE nexus.
- Development and testing of innovative approaches for local knowledge co-creation and participation.
- Enhancing of the visibility of the FWE nexus.

## Approaches/methods

- The project adopts an Urban Living Lab and Citizen Science approach
- Users as co-creators of knowledge

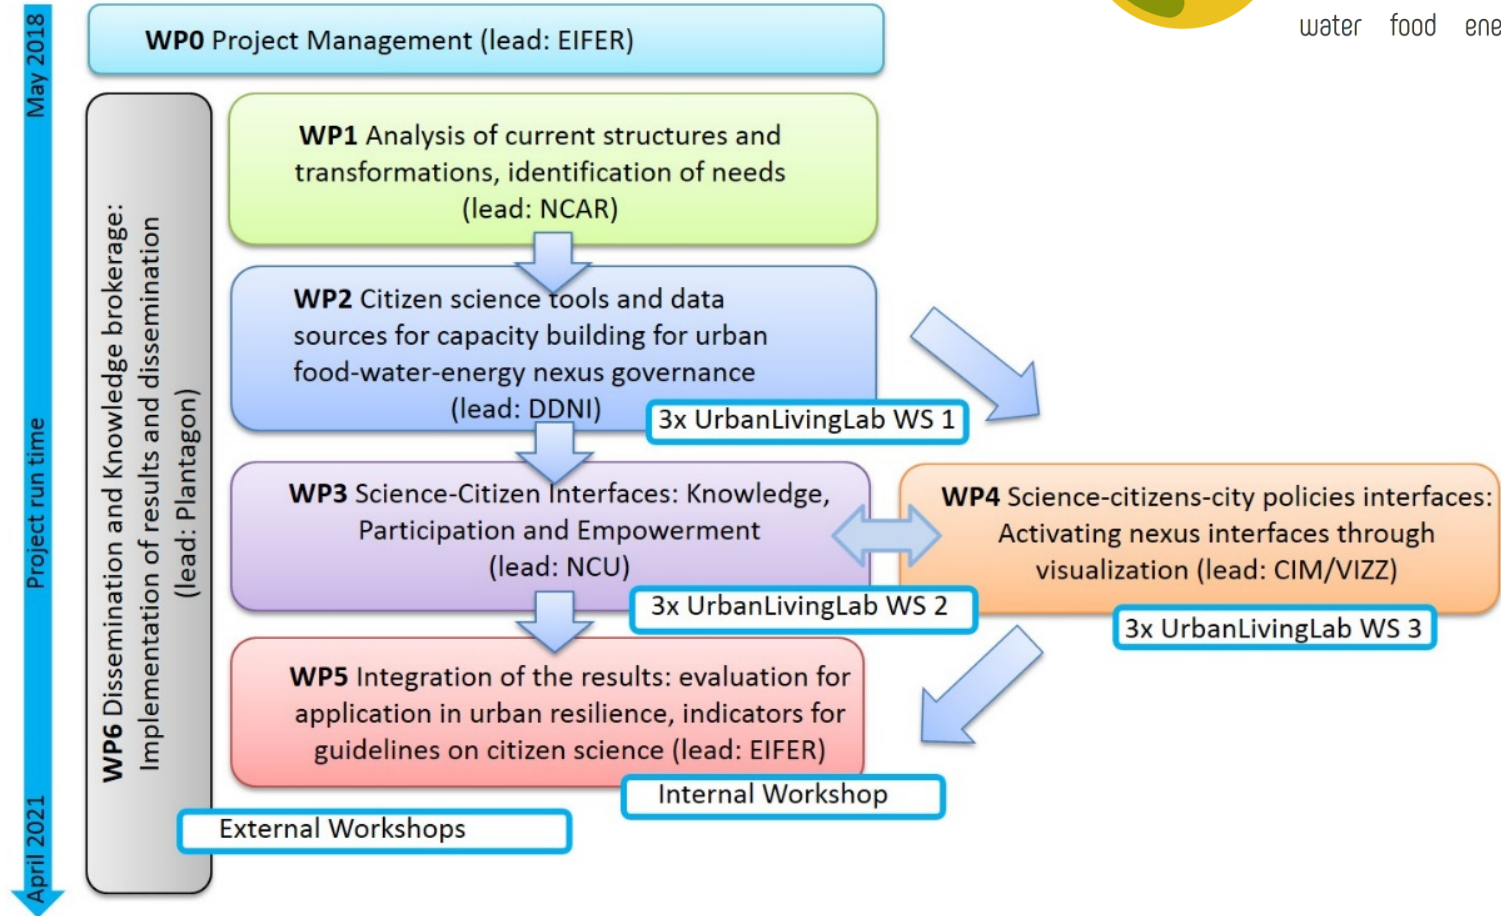

## Expected results and impacts

- Contribution to
  - science and to practice
  - the enabling of integrative transformative urban governance to promote FWE systems resilience.
- Recommendations regarding co-creative/integrative approaches for local governments, public authorities, or non-governmental organizations as well as scientists.
