

### UERA-TW3

#### **Third “accessibility and connectivity” UERA Thematic Working Group workshop**

**München 11th December 2019 TUM Technical University of Munich, Arcisstr. 21, München  
Organised by Alain L’hostis  
Université Gustave Eiffel**

17 participants in total (F, 3 ES, IT, 3 PT, 2 PL, 3 DE, NO, RO, GR, China)

6 presentations

The München seminar has gathered presenters around the three issues of the design of public space, of the urban transformations due to transport technological innovation, and urban strategies in face of mobility issues. The varied audience, made of scholars in spatial planning, in architecture, in transport studies, in economics and in geography has ignited a very interesting and stimulating debate from the presentations.

The date and place of the München seminar, similarly to the previous Lyon seminar, have been chosen the day before the NECTAR "accessibility" cluster meeting. The synergy with the NECTAR "accessibility" cluster has been extremely positive, to the extent that we will consider a scenario of hosting the UERA seminar as a sponsored session of the next annual NECTAR "accessibility" cluster seminars.
