

Era-NET Urban Accessibility and Connectivity

Innovation Action Call Projects Mid-Term Event

15 October 2024

ONLINE

The **Era-NET Urban Accessibility and Connectivity (ENUAC)** mid-term event for the **four projects under the Innovation Action call** is taking place online on 15 October 2024.

The midterm event will provide an opportunity for the projects to meet each other for knowledge sharing, strategic discussions, and exchanges on impact. Furthermore, the event will give the projects the opportunity to present interim results and exchange information on progress to date, particular challenges, and solutions. The event is also an opportunity for networking and community building.

For the duration of a call, projects are expected to participate in three events, a kick-off, a midterm and a final event. We expect at least **2-3 representatives from different project partners from each project** at this meeting. It is highly recommended that **one city partner** from each project also attends the meeting. Thereby, we would like to get the cities' point of view and learn about what their long-term perspectives about the respective project topics are.

Please be aware that this event is **by invitation only**. Community building within the program is an important aim of the event, and the invitation is therefore limited to researchers actively involved in the funded projects and their partners from outside academia also involved in the projects, as well as the involved ENUAC National funding agencies and experts from the European Commission.

Tuesday, 15 October 2024 (ONLINE)
